CHAPTER 6

Decision Making Style (scales)

Is it possible to change those characteristics of human behavior of which we are not aware? Yes, no and maybe. We are convinced that the only way to achieve that is to understand one's own behavior better. Below you will find the measurements of decision-making competences.

CHAPTER 7

Proactiveness and Leadership

The main task of a manager in relation to people is to be a good leader. The goal of a manager is to make the specific skills and strengths of every person productive. The competences listed below were carefully selected to build up the most efficient work strategy.

CHAPTER 8

Management Style

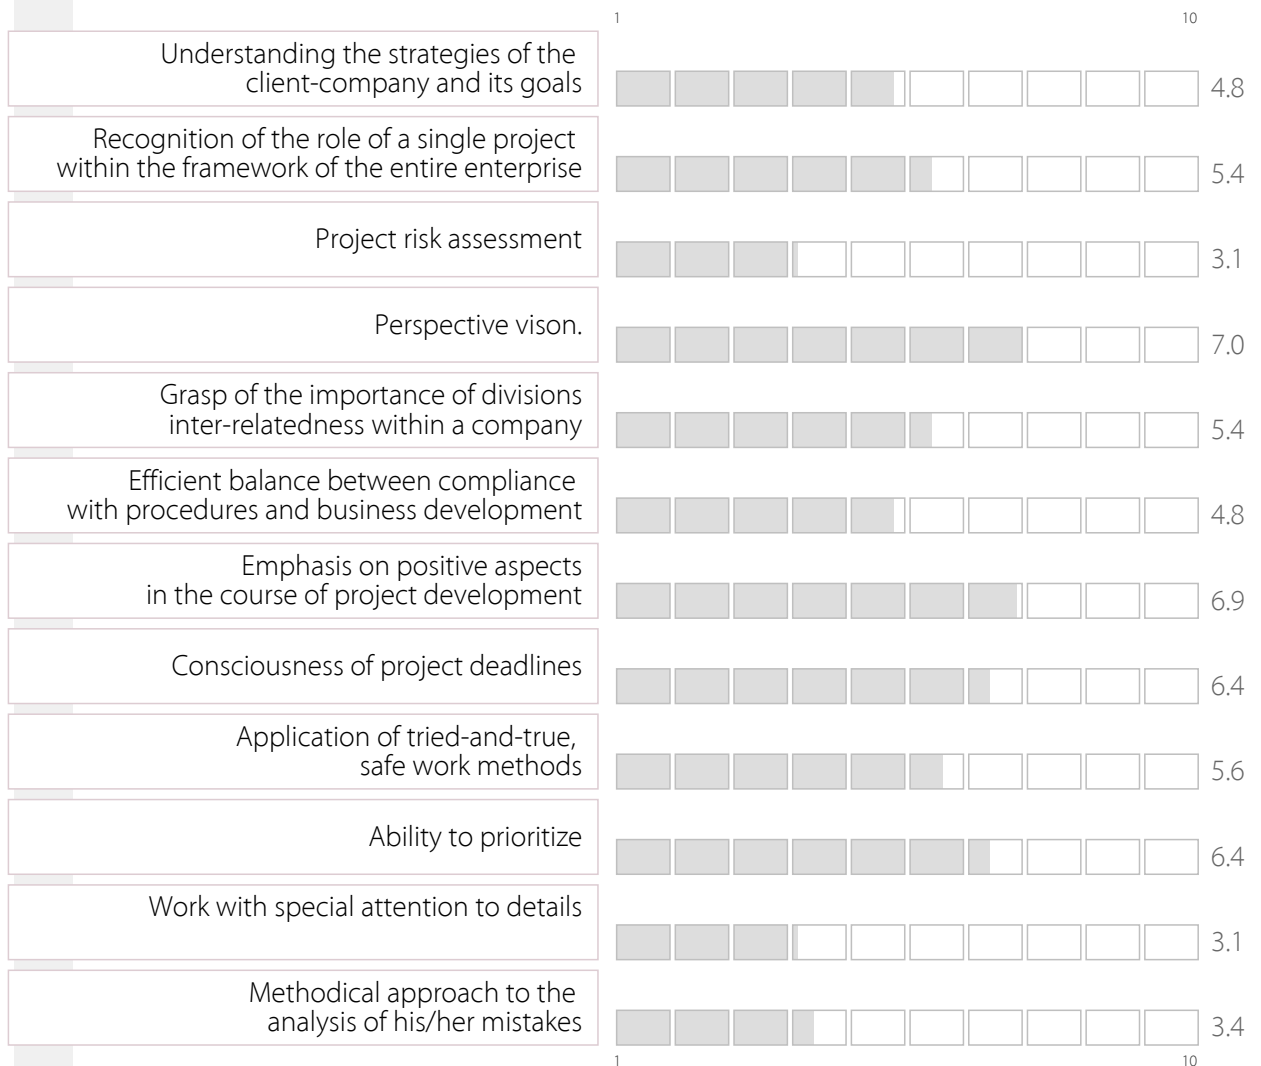

Management style in large part determines the success and the dynamics of the organization. From it depend many key-factors such as: motivation of employees, their attitude towards work and loyalty to the company, interpersonal climate, etc. This chapter discusses the traces and trends in behavior of the respondent as a manager.

CHAPTER 9

Strategic and Systemic Vision

Today success of a large company depends more on the teamwork of managers than on the efforts of a single leader. Often managers speak in favor of such teamwork but in reality maintain a work style that does not allow for sincere communication and effective interaction. Given below are competencies in the area of strategic and system vision of company projects

INSUNRISE ROSE - Job Profile

Introduction

INSUNRISE ROSE is a powerful multifunctional tool that can be applied independently or combined both, with the individual or Job Profile reports.

INSUNRISE ROSE was developed on the basis of DISC Model, designed to help each applicant to understand both himself and others better.

INSUNRISE ROSE helps to:

- Identify job matching
- Fix the difference between one's conscious and unconscious behavior;
- Identify and prevent inner stress;
- Minimize inconsistencies between one's way of behaviour at work and outside it;
- Helps to work out strategies to improve team spirit

To analyze the degree of job matching or direction of adaptation of behavior, it is necessary to compare the distance between the indicators of the Job (square) and Natural (rhomb) or Adapted Behavior (star) of one or more employees.

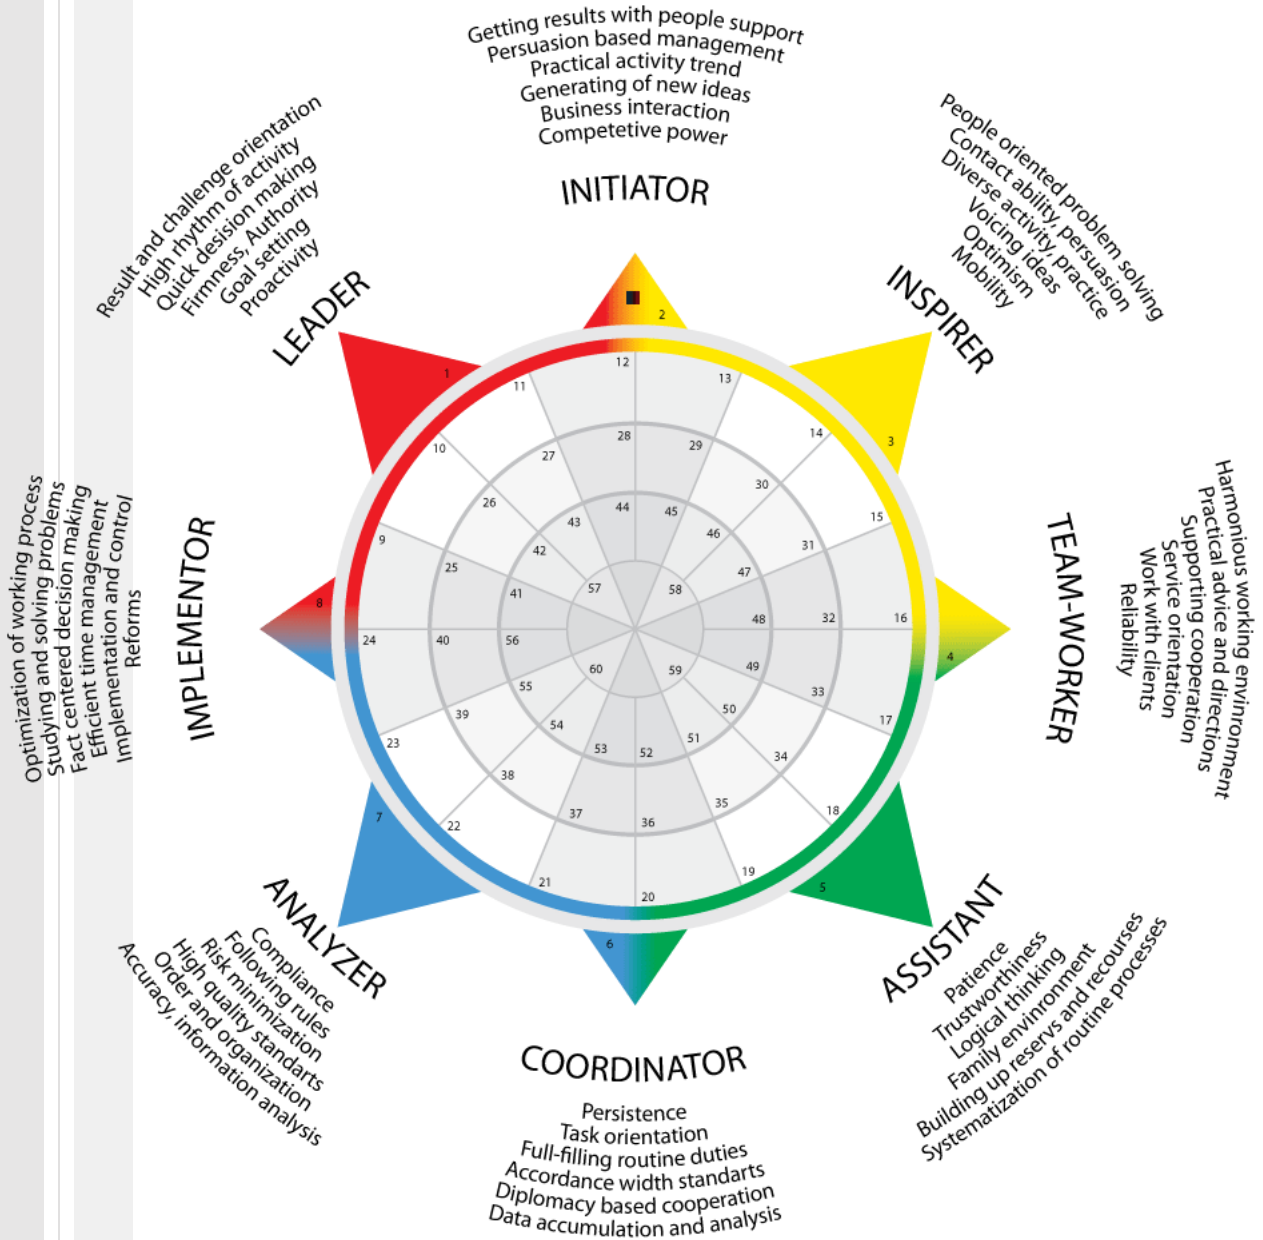

To observe the team dynamic it is advisable to place on the INSUNRISE ROSE the indicators of the Job position and then the ones of Natural and Adapted Behaviour of all members of the team and analyze the correlation between them.

Such method allows to identify quickly the areas of possible conflicts between members. You will be also able to see how to improve interaction and mutual understanding within the team.
